# Installation Instructions

## Step 1 - Surface Preparation

**A** Clean up the surface from dirt or dust.

If the scheme coat of the wall is weak, chalking or peeling, we recommend to use the **Wall Sealer Pro** (Page 26).

**B** Measure the dimensions of wall.

**C** Ensure your wall surface is non-wavy, dry, and solid.

If your surface is too wavy for the panels to be applied in flatly, a wooden frame can be built as a backing for the panels.

## Step 2 - Layout Planning

**A** Plan the panel layout.

**B** Some panels may need to be trimmed to fit your wall dimensions.

**C** Sand the trimmed part with sand paper and touch up with Archistra paint (Included).

**!** Ensure the whole part is coated & fully dried.

## Step 3 - Panel Application

**A** Apply **construction adhesive** on the back of the panel and stick to the wall. Press and hold the panel a few seconds to ensure it is in place.

**B** Install the panels working from the bottom upwards. The use of a leveler is recommended.

ACH-1101

### Superior primer for concrete, skimmed or masonry surfaces.

This sealer that has good substrate penetration abilities to increase adhesion of product to prevent chalking or peeling off. It has excellent alkaline resistance properties that can prevent efflorescence. It is an ideal base coat for any SUZUKA® or any wall finish products.

Packing Size:

1L 5L 20L

Coverage

6.5 - 8.5  
m<sup>2</sup>/l/coat

Drying Time (hour)

Surface Dry : 1 | Hard Dry : 5 | Recoating : 5

Substrate Temperature: 23°C - 26°C

Suitable for:

- Masonry wall
- Brickwork
- Plaster
- Skimmed Coat
- Asbestos free substrate

Features:

- Excellent alkaline resistance to prevent efflorescence.
- Good for new walls and repainting.
- Prevents skim coat from chalking & peeling off.
- Extremely good penetration.
- Excellent adhesion.
- Exterior and interior use.
- Applicable with brush, roller or spray gun.
